Установите соответствие между заголовками 1–8 и текстами A–G. Запишите свои ответы в таблицу. Используйте каждую цифру только один раз. В задании есть один лишний заголовок.

1. Just in time.
2. Just in case.
3. Eventful life.
4. A curious case.
5. Reduced Expectations.
6. Royal brother.
7. Royal ancestor.
8. Double trouble.

A. I am a mother of identical, mirror-image boys— David and John. No one but me can tell them apart. I am constantly amazed at how close they are. Once when they were babies David was ill, but it was John who began crying wildly. I tried to calm John first since nothing was wrong with him. But he only cried louder. Finally I gave some medicine to David — who really was unwell. As soon as John sensed his brother felt better, he immediately settled to sleep.

B. The 12 year old was playing near the Platte River in North Bend, Nebraska. The river was high and as the boy stepped in, the current pushed his legs away. He floated off, spinning in the powerful current. At the last possible moment before the rapids, his yells were heard by his dog. It jumped in, reached the boy and towed him ashore. Another second and the boy would have been swept away to certain death.

C. Armgaard Karl Graves, referred to in press reports as 'the Glasgow Spy', was convicted in Scotland under the Official Secrets Act(1911) for spying on the British Navy. He spent years successfully creating an identity as an Australian doctor and in Scotland even conducted important clinical experiments. But he was eventually caught by a suspicious post office worker as he sent and received post under a variety of assumed names.

D. Zsa Zsa Gabor was born in Budapest on February 6th, 1917. Now in her 90s she has had a long and varied life. She was a beauty queen and singer before becoming a famous screen actress. She was married 8 times but only had one child with second husband, Conrad Hilton. Her last marriage to Frederic von Anhalt gave her the honorary title Prinzessin von Anhalt.

E. "Who do you think you are" is one of my favourite TV programs. Each episode researches the family history of a celebrity, back into the mists of time. In the UK there are good records of births, marriages and deaths going back hundreds of-years. One of the best episodes was on Boris Johnson, the Mayor of London. He was thrilled when he discovered he was directly related to King George II.

F. Paris Hilton is a famous socialite, media personality, actress, model and singer. In 2007 her grandfather Barron Hilton pledged 97% of his estate— a value of more than 2 billion US dollars— to a charitable foundation. Many now believe that Paris and the other grandchildren have had their potential inheritance sharply reduced. Others have commented that this news was unlikely to change her future life style.

G. Andy always travels well equipped for any potential possibility. He has a sewing repair kit and a small medical kit with aspirin. These are, I suppose, perfectly sensible. But what about a ball of string, tape measure, masking tape, Swiss army penknife, disposable cutlery, disinfectant, dry bags and an inflatable back rest? Andy says you never know what might happen and it's always best to be prepared.

Doctor Who

Doctor Who is a British science-fiction TV series that follows the adventures of a time-traveling alien, called the Doctor, and his human companion, as they travel through time and space in a spaceship, called the TARDIS (Time and Relative Dimension in Space), and courageously save the world time and time again.

Doctor Who first aired on BBC on 23 November, 1963 and was one of the first science-fiction stories to appear on screen: 3 years before Star Trek and 14 years before the Star Wars franchise. In 1989, due to falling popularity, the show was suspended. But 16 years later, in 2005, it was brought back to the screen with a whole new cast of actors and has been ongoing ever since. It is considered to be the longest running sci-fi show in the world, having celebrated its 50th anniversary in 2013.

But how has Doctor Who managed to survive for this long? What sets it apart from other amazing shows that are now over? What makes Doctor Who really unique, is that it does not have to rely on any particular actor to continue. When the Doctor is close to death, he is able to start a biological process within himself, called regeneration, that changes every single cell in his body, while still leaving his mind intact. Essentially, he becomes a different person: new looks, new personality, new everything. But one thing that never changes is his genius, and his sense of humor. This means, that every four years or so, when the actors playing the Doctor decide to move on to different projects and leave the show, the producers can find a new actor to take on the iconic role. So far twelve actors have played the Doctor.

Another reason the show has been running for so long is that there is no main storyline, it is very much episodic, each episode telling a story of a separate adventure. So as long as the writers of the show keep coming up with new planets for the Doctor and his companion to visit, and new alien villains for them to defeat, the show can continue forever.

Doctor Who has an unbelievably huge fan base all over the world, so big in fact, that the 50th anniversary episode aired in 94 countries simultaneously, earning it a Guinness World Record. There is also a large amount of music, inspired by Doctor Who, and since the series renewal, a music genre called Trock (Time Lord Rock) has appeared. The most famous Trock band is Chameleon Circuit. They produce music exclusively about Doctor Who, and so far have released two albums.

Soon after Doctor Who's appearance in 1963, novels surrounding the series started to appear. The first ever novelization came out on 12 November, 1964, almost exactly a year after the first episode came out. Since then over 150 novelizations and 200 spin-off books have been published, including some written by Neil Gaiman.

Doctor Who has been an important part of popular culture for over half a century now. The show is limitless, filled with possibility: you can go to Victorian London, or to Pompeii, or to the 51st century. It can be any genre: comedy, horror, fantasy, drama, sometimes all of them at the same time. It's clever, and funny, and sad, and makes you think. The plots are well written, and sometimes you feel like you're twisting your brain into a knot, trying to figure out the paradoxes. But most importantly it's kind-hearted and beautiful. No doubt Doctor Who will remain a fan-favorite for many years to come.

The first Star Wars movie came out in...

1. ...1963.
2. ...1966.
3. ...1977.
4. ...1989.

Which of the following is NOT the reason why Doctor Who has been around for so long?

2. Chameleon Circuit rock group writes music for the Doctor Who TV series.
3. Both albums of Chameleon Circuit are centered around Doctor Who.
4. The music genre that is used in the Doctor Who TV series is called Trock.

In the 6th paragraph the author implies that...

1. ...the Doctor Who TV series inspired writers to create novels about the Doctor.
2. ...every Doctor Who episode later gets published in the format of a book.
3. ...Neil Gaiman has written some episodes for the Doctor Who TV series.
4. ...Doctor Who is based on more than 150 books by different authors.

Which choice is closest in meaning to the phrase "you feel like you are twisting your brain into a knot" in the last paragraph?

1. You are trying very hard to solve a problem.
2. You come to a dead-end while solving a problem.
3. You give your brain some good training.

Nicotine is colourless. In theory, cigarettes can be made out of potato or tomato leaves. Some programmes designed to help people stop smoking also advise giving up potatoes and tomatoes in order to eliminate low-level nicotine intake completely. In small doses, the nicotine compound that is present in all these plants produces feelings of pleasure. That's why tobacco is more addictive than either cocaine or heroin. But it's also why we sometimes find ourselves craving chips or pizza.

In large doses, however, nicotine is as deadly as the nightshade whose relative it is. The nicotine in a single cigarette, if taken direct into the bloodstream, would be fatal. Eating one cigarette could make you severely ill. Swallowing a packet of ten would definitely kill you. In 1976, the Department of Health urged pregnant mothers to wear rubber gloves when peeling potatoes. More than a kilogram of potatoes eaten at a single sitting would be certain death.

Пояснение. Dear Mary,

Thank you for your message. Im sorry for not writing you for so long. I spent my time doing a school project.

I hope that all your efforts will show a great result. I try to care more about my health lately: I try to avoid unhealthy and fat food. Also I train every morning and go to the gym. I think that sport and healthy food are the most important components of being healthy and strong. Nowadays, the healthy lifestyle becomes more and more popular and I don't see anything bad in it.

Anyway, youve mentioned holidays. With whom are you going to the seaside? Why have you decided to spend the month there? What exactly are you going to do?

Ive got to go as my dad is asking me to help him with his car.

Write back soon.

Best wishes,

Kate

Пояснение. 38.1. Nowadays a lot of teenagers spend their free time reading books particularly there is a variety of book genres. The aim of the project I am currently working on is to find out what book genres are popular among teenagers in Zetland. As part of my project, I have found and analyzed some relevant data presented in the table.

According to the data, the teenagers in Zetland have quite a wide range of tastes when it comes to book genres. It is clear, that the vast majority of the respondents enjoy reading adventure novels as well as detective stories (55.4% and 55.3% respectively). Sports stories are also quite popular with the teenage readers (49.2%), whereas romantic novels appear to be at the bottom of the table.

It is worth mentioning that animal stories are two times less preferable than adventure novels. To my mind, books about animals are written mostly for little children, not for teenage readers.

Statistics reveal one problem connected with reading. Obviously, there are no classical books in the table. Thus, teenagers in Zetland prefer reading books for relaxation than broadening their horizons. One solution to this problem is to organize discussing clubs for the adolescents there they can meet professors and theater actors, read together and read serious books. Live communication encourages better than boring lessons.

In conclusion, I firmly believe that reading is significant for teenagers. I hope the adolescents will be able to learn more reading different book genres. (245 words)

38.2. Many people believe that smartphones have become an essential part of modern life. The aim of the project I am working on is to find out what people use their smartphones for in Zetland. As part of my project, I have found and analyzed some relevant data presented in the diagram.

According to the data, there is quite a wide range of reasons when it comes to using smartphones. It is clear, that the vast majority of the respondents enjoy emailing as well as making phone calls (79% and 78% respectively). Surfing the internet is also quite popular with the smartphone users (58%), whereas paying for purchases appears to be at the bottom of the table.

It is worth mentioning that smartphones are used for playing computer games less often than for emailing. To my mind, it is comfortable to be in touch everywhere when it comes to business. At the same time, gaming is the most popular pastimes among teenagers.

One problem that people often face using smartphones is the poor quality of signal in some areas. It is very crucial nowadays due to the internet is necessary for using all options that modern devices provide. One solution to this problem is to create free Wi-Fi zones in public places, such as libraries, railway stations, parks where people can spend their time effectively and gain access to the internet for free.

In conclusion, I firmly believe that smartphones play a significant role in our life. They make our daily life easier but people should use them wisely. (258 words)

 3. I usually shop for food at the supermarket near my house. Sometimes I go to the local market with my parents to buy fresh vegetables and fruit.
 4. I prefer to eat in because its cheaper and healthier. Also, I enjoy cooking with my family— it makes the meal more enjoyable.
 5. I would recommend borscht, which is a beetroot soup, and blini, which are thin pancakes. Foreigners should also try pelmeni — dumplings with meat — because they are very popular in Russia.

Пояснение. Hey, Kate. You know that? I've just found two pictures suitable for our project "Life without gadgets". Let me tell you a bit more about them.

They are relevant to our project because in both pictures we can see people reading books. In the first photo there is a girl reading a book in the library. While in the second photo there is another girl sitting on the sofa and reading an e-book. There are a few differences to illustrate our project better. For example, the first picture depicts a paper book, the girl has chosen this book in the library and now she is going to read it, whereas the second picture shows an electronic device for reading books.

In my opinion, both types of books have their advantages. For instance, an e-book has relatively small size but it can contain a great number of novels and stories. As for paper books, they are not require any electricity so that they can be read everywhere. Of course, the two types of books have disadvantages too. For example, using electronic device for a long time is harmful for eyes. Meanwhile, paper books are rather heavy to be carried with.

Personally, I would not like to live without gadgets. Although, electronic devices can be health damaging they make my life easier. So, I'm not ready to give up all of them.

So, shall we use these photos in our project? Call me when you're ready to discuss if we can use them. Bye-bye.
